SUMMARY

Product Manager and founder with 3+ years of experience in product strategy, user experience, distribution strategy, roadmapping, and 0 to 1 product development. Currently Product Manager Intern at Mindspace.ai, driving user experience and distribution strategy for a voice AI product. Founder and Head of Product at Lucide Tech, owning product strategy, roadmap, and execution across a SaaS and client product portfolio. Solo founder of Superforms, an AI form builder, with hands-on experience in market research, user research, GTM strategy, and distribution. Skilled in cross-functional collaboration, stakeholder management, wireframing, prototyping, and data-informed decision making.

EDUCATION

Indian Institute of Information Technology, Nagpur — **Expected 2028**

Bachelor of Technology, Computer Science and Engineering, Nagpur, Maharashtra

Indian Institute of Technology Madras — **Ongoing**

Bachelor of Science (BS) in Data Science, Online

EXPERIENCE

Product Manager Intern — **Aug 2026 – Present**

Mindspace.ai — *Remote*

- Own product strategy and user experience for Mindspace's homepage redesign, driving multiple iterative product cycles from requirements to shipped landing page.
- Lead user experience design for Tara, Mindspace's voice AI product, including user flow, mobile experience, and visual design system, translating user needs into product requirements.
- Drive distribution strategy for Mindspace's product launch, identifying positioning, target user segments, and go-to-market messaging to support user acquisition.
- Conduct rapid product iteration and stakeholder review cycles, translating product requirements and brand direction into a cohesive user experience across the site.
- Collaborate cross-functionally with founders and engineering to align product decisions on user experience and distribution strategy with business goals.

Founder and Head of Product — **Apr 2025 – Present**

Lucide Tech (lucide.in) — *Nagpur, Maharashtra*

- Hold full founder and Head of Product responsibility for Lucide Tech, owning product strategy, roadmap, and prioritization for a web agency serving 3+ associate agencies with SaaS products and client portals.
- Identified a recurring operational gap across client engagements and defined the product requirements for the Lucide Platform, an internal agency operating system built on Next.js, TypeScript, PostgreSQL, and Prisma, reducing project delivery friction by 40%.
- Own the end-to-end product lifecycle, including discovery, requirement gathering, UX direction, and delivery, coordinating design and engineering work and owning final ship decisions on Vercel and Railway.

Club Head — **Sep 2025 – Mar 2026**

Avalok, IIIT Nagpur — *Nagpur, Maharashtra*

- Owned the creative product vision and brand direction for Avalok, the media cell of IIIT Nagpur, for 7 months.
- Led a cross-functional team across graphic design, motion, and content, setting priorities and design systems for college-wide events.

Sales and Marketing Intern — **May 2025 – Jul 2025**

PathBreakers — *Remote*

- Supported go-to-market strategy and executed social media marketing campaigns over a 3-month remote engagement.
- Contributed to lead generation and brand messaging, building early instincts for distribution and growth.

Snapchat Opinion Leader **Aug 2022 – Jul 2023**

Under 25 Universe *Bangalore, Remote*

- Selected as a content creator and opinion leader for a 1-year engagement, creating graphic design and VR-adjacent digital content for a youth audience.

Social Media Manager **Jan 2023 – Mar 2023**

Calix Labs *Delhi, Remote*

- Owned content strategy, platform scheduling, and audience engagement tracking for a 3-month internship.

PROJECTS

Superforms | AI Form Builder, Product Strategy, GTM Strategy, Solo Founder **2025 – Present**

superforms.in

- Founded and solely built Superforms end-to-end, covering product strategy, UX design, and engineering, after identifying a clear market gap: most form builders force branding on creators, and a majority of form creators spend more time planning questions than building the form itself.
- Defined the product positioning (design-first, zero forced branding) and built the core experience: an AI engine that generates form structure, logic, and design from a plain-language description in under 60 seconds.
- Own the full product roadmap and am currently driving distribution strategy and user acquisition through targeted use cases, including lead qualification, hackathon intake, research surveys, and event registration.

Luman Workspace | Next.js, Supabase, OpenAI API, Vercel AI SDK, Product Strategy **2025 – Present**

luman-five.vercel.app

- Scoped and led product requirements for a multi-tenant AI workspace combining a Notion-style editor, task board, and calendar into one team operating system for organizations.
- Designed the role-based permission model (Founder, Intern, and other roles), invitation flows, and access control strategy needed to make the product enterprise-ready.

Strawberry | Next.js, LLM Agents, Graph Simulation, Product Research **2024**

strawberry-v1.vercel.app

- Defined the product thesis for a decision intelligence platform that simulates how strategic narratives cascade through populations, grounded in GSS 2024 sociometric data covering 1,499 behavioral vectors.
- Directed the Trinity Engine concept, combining behavioral profile synthesis and social graph simulation, enabling organizations to stress test strategies and identify adoption bottlenecks before real-world rollout.

CompareFi | React, Tailwind CSS, REST APIs, UX Design **2024**

comparefi.in

- Identified a usability gap in financial comparison tools and led the product and UX design for a comparison engine built for data-heavy, mobile-first user flows.

ACHIEVEMENTS

- 1st Place, UX Wizarding, E-Summit 2025, IIIT Naya Raipur: led a team of 4 through user research, personas, wireframes, and final solution presentation.
- 1st Place, Rebranding Wars, Zepto Brand Hackathon 2025: directed brand strategy, visual identity, and campaign design for a team of 4.
- 1st Place, Campus Innovate Hackathon, G.H. Raisoni College of Engineering 2025: built and pitched a product solution under time constraints.
- 2nd Place, BrandXperience, TantraFiesta, IIIT Nagpur 2025: designed brand identity and positioning strategy from scratch.
- 2nd Place, Rebranding Wars, E-Summit, IIIT Nagpur 2025: redesigned Kodak and Krave Beauty UI/UX under time pressure.

- 3rd Place, Cineblitz, Delhi Technological University 2024: contributed to ideation, filming, and editing for a creative competition.
